# How to Make the ORION Flag:

The symbol of the ORION Party is the swastika, an ancient and noble symbol representing the Sun, used by Europeans and American natives since the Neolithic Age. The ORION symbol is the Buddhist symbol meant to convey universal harmony, good fortune and eternity. We wish to convey the same.
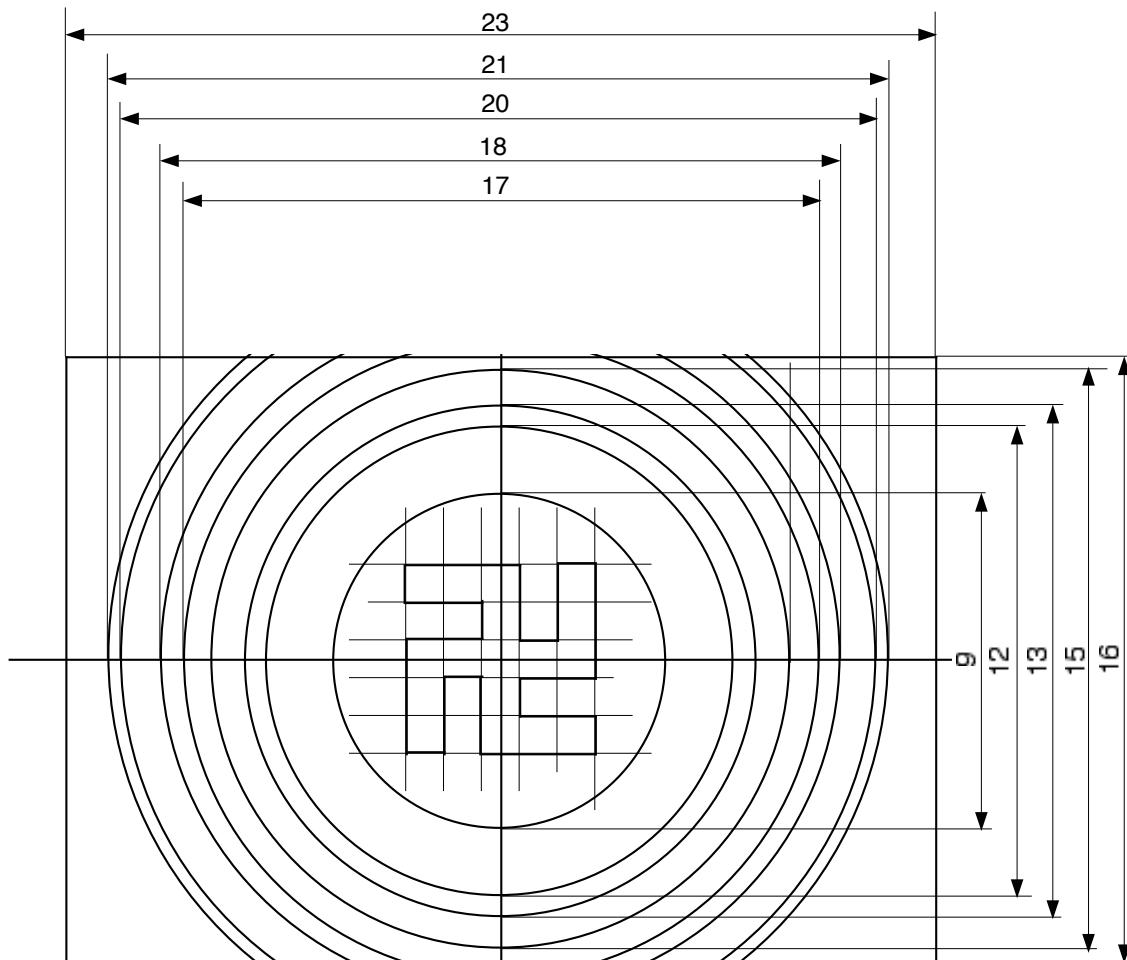

The swastika seems like a simple symbol to draw, and freehand it is, but to be proportionally the same in all cases the proportions have to be determined. Begin by lightly drawing a square, the size determined by eye depending on how large you want it to be, i.e., for a flag, for a wall design, etc. Divide the sides of the square into 5 equal parts to make a grid:

Darken appropriate lines of the grid to give a beefy swastika. For proportionality on any drawing, the thickness of the swastika will be taken as one unit, whether inches, centimeters, feet, meters, etc., or make your own metric. Extensions of this proportion will be used to make the rest of the swastika and the various circles of the flag.

The various metrics are as follows:

With these metrics we can find the dimensions of any ORION symbol. For instance, a common size for the American flag is 5 feet or 60 inches by 3 feet or 36 inches. Using this flag length of 60 inches, 60/23 = 2.61. This ratio must apply to all other dimensions, so on our wanted flag the swastika symbol will be 5 x 2.61 = 13 inches square, and its thickness will be 1 x 2.61 = 2.61 inches, or 1/5 of the swastika size: 1/5 x 13 = 2.6 inches. The first circle will have diameter dimensions 9 x 2.61 = 23.5 inches and 12 x 2.61 ≈ 31 inches, and so on. The width of the flag will be 16 x 2.61 ≈ 42 inches, which is not too far from 36 inches. If, on the other hand, your flag size was to be determined by your swastika size, and that wanted size is 2 feet square = 24 inches square for the wall of a building, then 24/5 = 4.8, and the full length of the design would have to be 23 x 4.8 ≈ 110 inches (9 feet - 2 inches) and its width would have to be 16 x 4.8 ≈ 77 inches (6 feet x 5 inches).

This is how the final product should look. The golden swastika represents prosperity and well being, the red circles represent the victory of Life, or of human progress, expanding over a sea of entropy represented by the black background.

As of this date (April, 2019), the ORION Party does not yet exist. Initialization of the party is therefore open to any willing American. First and foremost to be understood is that it is a party meant to achieve the American Presidency and Congress in a federal election. There is only *one* objective with any meaning for White Nationalism in today's America, and that is *achieving a White nation*. Everything else is a *diversion*. For this purpose ORION is *political*, i.e., non White supremacist. White supremacy is offensive, certainly to non-Whites but also to White Americans, many of whom would vote for White nationhood. White supremacy, therefore, is *negative* for garnering votes.

To organize, chapters will begin in diverse American regions using the ORION booklet to attract members. After a period of growth, they will converge to pick a national leader. Further information is available from esperanza2019@tutanota.de.
